

Main features																			
Application	space heating and hot water heating																		
Description	tepelné čerpadlo je vybaveno směšovacím ventilem s pohonem pro zajištění dodávky otopné vody o požadované teplotě, oběhovým čerpadlem pro připojení na okruh vrtu či zemní smyčky, akumulační nádrží s integrovaným měděným výměníkem pro dodávku teplé vody a řídícím systémem pro individuální nastavení a monitoring funkce; ve standartní dodávce je již obsaženo čidlo pokojové teploty																		
Working fluid	R407C (refrigerant), antifreeze fluid (brine circuit), water (heating c.)

* Energy Efficiency Index

The energy efficiency of the package of products provided for in fiche may not correspond to its actual energy efficiency once installed in a building, as the efficiency is influenced by further factors such as heat loss in the distribution system and the dimensioning of the products in relation to building size and characteristics.

Supplier: *R E G U L U S spol. s.r.o.*

Model: *EcoHeat 406*

I	The value of the seasonal space heating energy efficiency of the preferential space heater	123	%
II	The factor for weighting the heat output of preferential and supplementary heaters of a package	-	-
III	The value of the mathematical expression $294/(11 \cdot P_{\text{rated}})$	2,06	-
IV	The value of the mathematical expression $115/(11 \cdot P_{\text{rated}})$	0,80	-
V	The value of the difference between the seasonal space heating energy efficiencies under average and colder climate conditions	2,00	%
VI	The value of the difference between the seasonal space heating energy efficiencies under warmer and average climate conditions	1,00	%

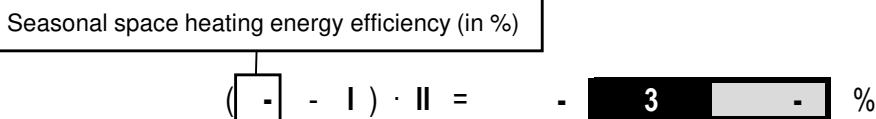

Seasonal space heating energy efficiency of heat pump

I = 1 123 %

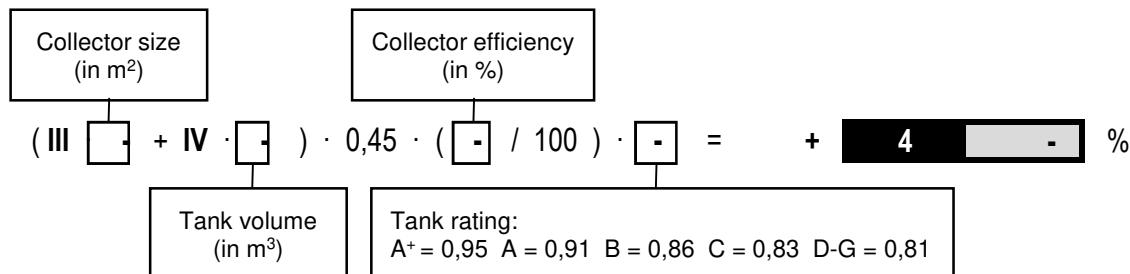

Temperature control (from fiche of temperature control)

Class I = 1,0%	Class II = 2,0%	Class III = 1,5%	+ 2 3,5 %
Class IV = 2,0%	Class V = 3,0%	Class VI = 4,0%	
Class VII = 3,5%	Class VIII = 5,0%		

Supplementary boiler (from fiche of boiler)

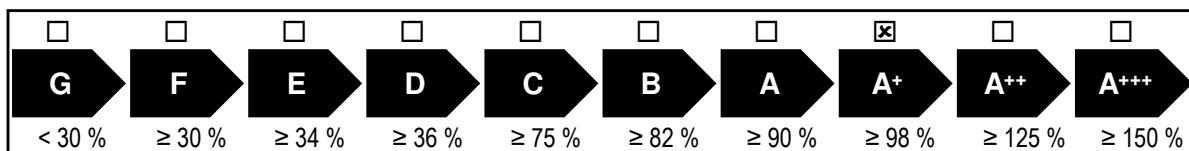

Solar contribution (from fiche of solar device)

Seasonal space heating energy efficiency of package under average climate 5 127 %

Seasonal space heating energy efficiency class of package under average climate

Seasonal space heating energy efficiency under colder and warmer climate conditions

Colder: 5 123 - V = 125 %

Warmer: 5 123 + VI = 128 %

The energy efficiency of the package of products provided for in fiche may not correspond to its actual energy efficiency once installed in a building, as the efficiency is influenced by further factors such as heat loss in the distribution system and the dimensioning of the products in relation to building size and characteristics.

I	Water heating energy efficiency of combination heater	86	%
II	The value of the mathematical expression $(220 \cdot Q_{ref}) / Q_{nonsol}$	-	-
III	The value of the mathematical expression $(2,5 \cdot Q_{aux}) / (220 \cdot Q_{ref})$	-	-

Water heating energy efficiency of combination heater

I = 1 **86** %

Declared load profile

L
